

Vertical refrigerated plug-in multi-deck with doors at low temperature, powered by propane refrigerant gas R290, suitable for the display and self-service sale of frozen food.

Buran vertical range is a plug and play solution with an excellent quality-price ratio, easy to install and maintain.

Buran is perfect for small & medium-sized supermarkets and convenience stores, but it is also a valid option in all those areas of hypermarkets where you cannot connect the cabinet to the rack system.

Buran is also available in two medium temperature versions, with two or three doors.

Climatic class 3L1
