

Positive temperature plug-in refrigerated island with sliding covers, operating on R290 propane gas, suitable for the display and self-service sale of prepacked products such as meat, delicatessen and dairy products. Elba is characterized by an essential design that combines solidity of structure and aesthetic lightness; designed to offer maximum visibility of the goods on display thanks to the full-height windows on all 4 sides. The Elba range is perfect for self-service sale of promotional products and impulse purchases. Elba is also available in the following versions: ELBA LIGHT, at positive temperature, and ELBA SW switchable from positive to negative temperature.

CLIMATIC CLASS: 3M1 - 3M2
