

Mistral PG Plus

Plug-in multi-deck vertical cabinet with doors, for positive temperatures, suitable for the self-service display and sale of pre-packed products such as meat, deli products, dairy products, fruit, and vegetables.

Mistral PG is the plug-in version of the Mistral wall-mounted cabinet range, featuring a condensing unit mounted on the top of the cabinet. The range has been designed with a strong focus on energy efficiency, offering very low noise levels and extremely low energy consumption. Mistral's design is elegant and essential, engineered to offer maximum visibility for displayed products and to adapt perfectly to any display requirement. Mistral features a very low front height that is identical for all models, both for positive and negative temperatures, thus allowing for exceptional aesthetic uniformity throughout the store.

Mistral PG Plus is characterized by double upright shelves which allow it to reach +16% of display surface and a load capacity up to +30% compared to the other range models.

CLIMATIC CLASS: 3M2 - 3H

ENERGY LABEL

Energy class referred to a specific cabinet configuration, which may significantly change for a different one.
