

Mistral SV Freespace

Mistral SV Freespace is a vertical cabinet solution that outperforms traditional back-to-back configurations. It offers more display while keeping the same footprint: each shelf provides up to 18% more display space, maximizing visibility without increasing the overall footprint.

Thanks to a single evaporator and a single controller, this solution reduces both purchase and installation costs, making it particularly efficient and cost-effective.

This product is part of the Mistral range, the next generation of DRR vertical cabinets. Designed for low energy consumption and high efficiency, it simplifies multiplexing operations while maximizing performance. Mistral combines elegance and simplicity with outstanding product visibility, adapting seamlessly to any display need.

CLIMATIC CLASS: 3M1 - 3M2 - 3H

ENERGY LABEL

Energy class referred to a specific cabinet configuration, which may significantly change for a different one.
